👤 MY STORY

My journey began in 2016 with a simple question of “what is coding?” Without prior knowledge and coming from a medical background, this simple question led me to the adrenaline rush and empowerment as I gained knowledge in the world of programming. Fast forward to 2021, I decided to develop my own front end project. Spending an average of 50 hours per project, with innumerable trials behind me, here I am, writing my resume, working on my portfolio, and still telling myself to keep going.

🎓 EDUCATION

Bachelor of Science in Biology, University of Illinois at Chicago, Chicago

August 2012

Master of Science in Nursing, Rush University, Chicago

May 2015

★ PROJECTS (VISIT EACH PROJECT UNDER THE LINKS SECTION)

Pacman

Recreation of the Pacman game using HTML, CSS, and vanilla JavaScript. Highlights DOM manipulation and use of conditional statement skills.

Hulu Press Clone

Hulu Press website (link) clone using React. Displays understanding of the fundamentals of React. With Hulu having no public API, images were pulled from their website to make a data set to mimic API response.

Dictionary App

React project using a dictionary API (link) and React’s Context to update and share data between components. LocalStorage is used to store, retrieve, and display previous data in the “My List” page.

Weather App

HTML, CSS, vanilla JavaScript, and weather API (link) to provide weather forecast.

★ OTHER EXPERIENCE

Registered Nurse

August 2015 — January 2022

Leadership in guiding and educating new graduates as a charge nurse and a clinical nurse leader in an acute care hospital.
